Good Practices

- Make your title short to summarize the message of the research.
- Do not include references unless it is imperative.
- Use just one or two colors on a plain colored background.
- Put the conclusions in a prominent panel (preferably at the bottom of the poster).
- Poster text must be readable from 2 meters (with possible exception of references) and the title from 4-5 meters.
- Mostly to avoid capital letters except at the beginning of sentences and proper nouns
- Use a black sans serif font, e.g. Arial or Gill Sans throughout.
- Use a bolder, larger typeface for the main titles and headings. It can be effective to use a different typeface for headings and subheadings.
- To emphasize body text, use a bold or italic font.
- Check the draft of your poster very carefully to ensure that there are no typographical or style errors
